

## Research Funding Opportunity

<b>Program Title</b>	Industry/University Cooperative Research Centers Program (I/UCRC)
<b>Solicitation/RFP Code</b>	<a href="#">NSF 07-537</a>
<b>Funding Organization(s)</b>	National Science Foundation Directorate for Engineering Industrial Innovation and Partnerships Directorate for Computer & Information Science & Engineering
<b>Funding Amount(s)</b>	\$6,000,000 to \$9,000,000
<b>Application Deadline(s)</b>	LOIs - First Friday in January, Fourth Friday in June Full Proposals - Fourth Friday in March, Fourth Friday in September

### Program Summary

The Industry/University Cooperative Research Centers (I/UCRCs) program develops long-term partnerships among industry, academe, and government. The centers are catalyzed by a small investment from the National Science Foundation (NSF) and are primarily supported by industry center members, with NSF taking a supporting role in their development and evolution. Each center is established to conduct research that is of interest to both the industry and the center. An I/UCRC contributes to the Nation's research infrastructure base and enhances the intellectual capacity of the engineering and science workforce through the integration of research and education.

Only U.S. academic institutions with graduate research programs may apply. Please see Section IV. Eligibility Information for details on organizational eligibility information including:

- research and graduate program requirements, and
- letter of intent, planning grant, and full center proposal requirements

Estimated Number of Awards: 2 to 8 full center awards and 4-12 planning grant awards annually.
